Pushing Boundries: Innovating Mixed Methods for the Future

Prof Jerome De Lisle

Prof Jerome De Lisle is Professor of Educational Leadership at The University of the West Indies (UWI), St. Augustine, Trinidad. He was Director of the School of Education (2019 to 2022) and Deputy Dean, Postgraduate Studies and Research of the Faculty of Humanities and Education (2015-2019). He was Chair of the Ethics Committee at the St Augustine Campus of the University of the West Indies (2019 to 2023). His multidisciplinary research and evaluation work through the multiple educational specializations of educational psychology, educational sociology, educational leadership, and curriculum studies. His primary research focus is on identifying, explaining, and reducing equity gaps in schooling for key marginalized groups. His onto-epistemological positions are purposely diverse and often enacted through elaborate multiple and mixed methods research and evaluation (MMRE) designs. He has published mixed methods studies in several Tier 1 (Q1) journals in the fields of educational measurement (standard setting), educational leadership (high poverty schools), and educational assessment (formative assessment). His latest policy work on assessment and system reform in Trinidad and Tobago considers the utility of mixed methods research as a tool for participatory policy analysis in the Caribbean and global South.

Prof Anthony J Onwuegbuzie

Prof Anthony J. Onwuegbuzie is an award-winning teacher, researcher, author, and mentor. Currently, he is a Professor Extraordinarius at the University of South Africa and Distinguished Visiting Professor at the University of Johannesburg. His research areas primarily involve social and behavioral science topics, including disadvantaged and under-served populations such as minorities and juvenile delinquents. Additionally, he writes extensively on qualitative, quantitative, and mixed methodological topics. With an h-index of 112 and more than 110,000 citations, he has secured the publication of more than 580 works, including more than 450 journal articles, 50 book chapters, and 6 books. He has delivered more than 1,000 presentations, 250 methodological workshops, and 70 keynote addresses worldwide. He is former editor of Educational Researcher. Currently, he is editor-in-chief of both the International Journal of Multiple Research Approaches and the Journal of Mixed Methods Studies. He is founding member and past President of the Mixed Methods International Research Association. Professor Onwuegbuzie was a recipient of the 2018 National Research Foundation (NRF) top honors awards in the science and research field—receiving an “A” rating. According to the AD Scientific Index World Scientist and University Rankings 2023, within the Field of Education (i.e., Educational Research Scientist), he is ranked #1 in the United Kingdom, #1 in Africa, #2 in Europe, and #11 in the World. Also, Research.com, “one of the major websites for Social Sciences and Humanities research offering credible data on scientific contributions since 2014,” recognizes Professor Onwuegbuzie as a top cited Social Sciences and Humanities Scientist, being ranked #5 in the United Kingdom and #84 in the World. Consequently, he received the 2022 Research.com Social Sciences and Humanities in United Kingdom Leader Award as well as the 2023 Research.com Social Sciences and Humanities in United States Leader Award. Also, while at the University of Cambridge, he received the 2023 Best Researcher Award: International Academic Awards. Most notably, Professor Onwuegbuzie is the #1 most cited Educational Research Scientist in the world in terms of number of citations over the last 6 years

Message from MMIRA President: Loraine D. Cook

On behalf of the Executive Committee of Mixed Methods International Research Association I am pleased and honoured to welcome you to the sixth Bi-annual Global Mixed Methods International Research Association (MMIRA) conference. We are excited that this conference is taking place in the Caribbean for the first time, specifically in Jamaica, where the first Chapter of MMIRA was initiated by the then-leadership team from MMIRA in 2017. We express our gratitude to the conference committee Chairs -Dr. Jessica Stander, Australia, and Dr. Mphahlele, Ramashego, South Africa - and their committee members who worked tirelessly to make this conference happen. Also, thanks to the members of the subgroup in the Caribbean, coordinated by Dr. Ingrid Hunt Anderson, for supporting the MMIRA's conference committee. **Special thanks to Professor Jerome De Lisle and Prof. Tony Onwuegbuzie for agreeing to bring the keynote addresses to this historic conference.**

Professor Delisle is one of the Caribbean's most recognized expert mixed methods researchers. His recent policy work on assessment and system reform in Trinidad and Tobago articulates the usefulness of mixed methods research for participatory policy analysis in the Caribbean and global South. **Prof. Tony Onwuegbuzie** is presently editor-in-chief of both the International Journal of Multiple Research Approaches and the Journal of Mixed Methods Studies. He is a founding member and Past President of Mixed Methods International Research Association. Most notably, Professor Onwuegbuzie is the world's #1 most cited educational research scientist regarding the number of citations over the last six years.

The conference's theme, "Pushing Boundaries: Innovating Mixed Methods for the Future", will facilitate discussion of the evolving nature of mixed methods research in an era of big data and Artificial Intelligence, and address creative innovations in conducting mixed methods research. To assist us with our discussions, the conference committee has selected approximately 115 abstracts for parallel sessions; presenters from various countries worldwide will be attending either face-to-face or online. Professor John Creswell will add to the global conference space by coordinating the Asian symposium with several conference delegates travelling from different Asian countries. There will also be nine workshops to enhance the knowledge and skills of mixed methods researchers conducting research in a dynamic and complex global environment.

We are confident that this Hybrid Global Mixed Methods conference will hugely benefit researchers in the current research landscape, both in the academic and corporate context. Researchers are constantly challenged to be innovative and competent in conducting complex research.

Enjoy while you share, learn and network!
